

Following the templates provided in 'stack.c', 'stack.h' and 'main.c', complete the Lab3 task, and submit 'stack.c', 'stack.h' and 'main.c' to iSpace. (Noted that you only need to implement functions in 'stack.c', you should not modify the other files.) Please also include clear and concise comments in your code to explain the key implementation logic.

Your output should be:

```
-8.000000
-3.000000
6.500000
5.000000
Top: -8.00
Top: -3.00
5.000000
```
